Agile Work Tools

It's not just the nature of work that has changed; in today's global, increasingly digital-first economy, the needs of workers have also shifted. Productivity is no longer about punching a time card or clocking in and out. It's about how powerfully, efficiently and effectively workers can use their 9 to 5 hours. In other words, working smarter, not necessarily harder. Part of working smarter means working in an environment that supports the format of the work being done and the stage of the project the work is at.

The rise in co-working spaces doesn't only parallel the rise in remote workers and the changing nature of working hours. It also tells us that there is a preference for larger companies to rely on smaller, leaner teams, and groups who can demonstrate a deep expertise, working on a project-to-project basis. Running a tight but steadily moving ship like this requires an office that will be as responsive as the principles these cohorts are built on. A productive workspace is not only a flexible one or a balanced one, with ample room for various sizes and functions, it's also an "agile" one. It's a workplace design that mimics the inquiry, creativity, testing, development, and design stages that are at the core of the work itself.

Lemon has created unique set of collaboration products that have been specifically designed for Agile Workspaces.

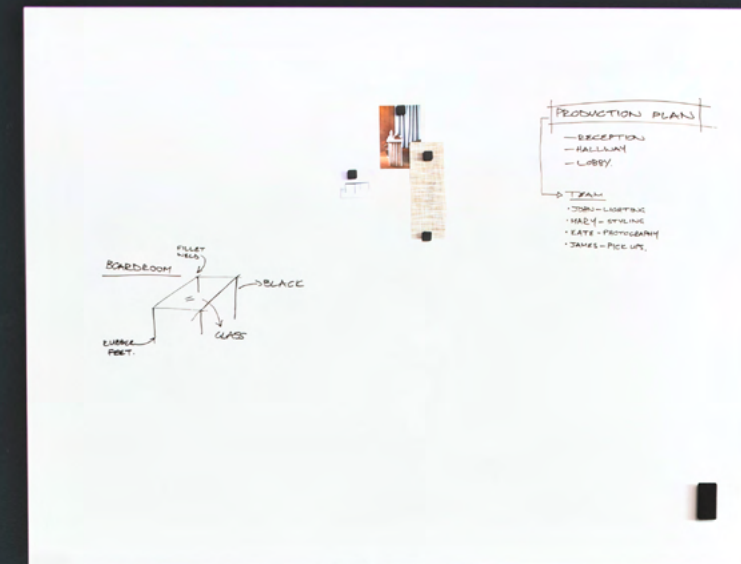

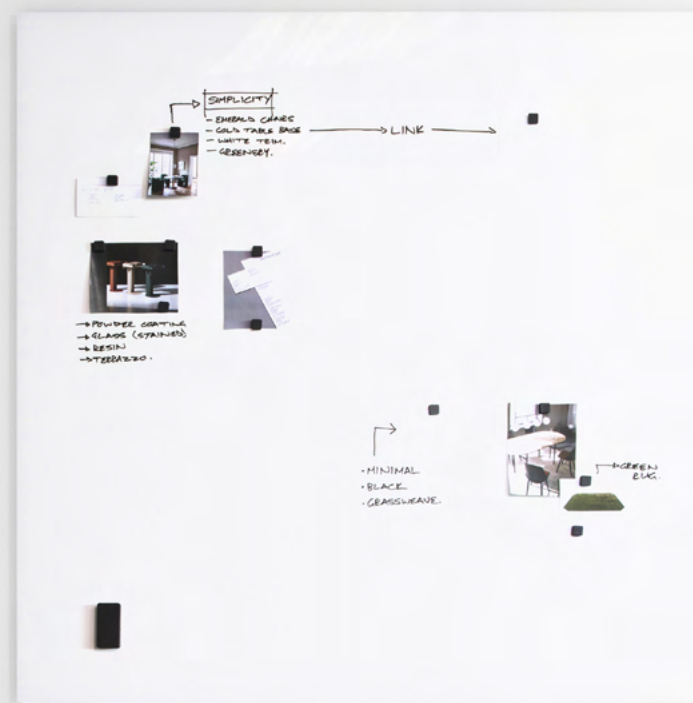

Collaboration

Writing Surfaces

Manufacturer	Lemon
Product Name	Frameless Magnetic Glass Writing Board
Finish Options	Optically clear toughened safety glass. Can be customised (logos)
Sizes	900mm x 900mm 1200mm x 1200mm 600mm x 900mm 900mm x 1200mm 900mm x 1600mm 900mm x 2000mm 1200mm x 1500mm 1200mm x 1800mm 1200mm x 2400mm *Available in landscape and portrait
Lead Time	Stock Item
